

Adult E-Cigarette Use in Mississippi

Fact Sheet

MISSISSIPPI STATE DEPARTMENT OF HEALTH

Results from the 2015 Mississippi Behavioral Risk Factor Surveillance System

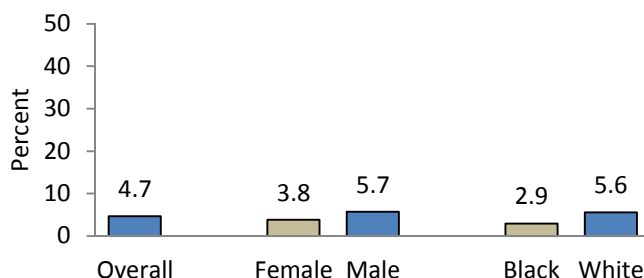

The Mississippi Behavioral Risk Factor Surveillance System (BRFSS) is a state-based surveillance that was developed and conducted in order to monitor state-level prevalence of behaviors (including cigarette smoking) that contribute to the leading causes of morbidity and mortality among adults. The 2015 Mississippi BRFSS was completed by 6,035 Mississippians aged 18 years or older.

Current e-cigarette use among Mississippi adults

The percentage of Mississippi adults who reported current e-cigarette use was (Figure 1):

- 4.7% overall
- 3.8% among females and 5.7% among males
- Significantly higher among whites (5.6%) compared to blacks (2.9%)
